Education

Kiet Group Of Institution   **Nov 2021 – Jun 2025**
B.tech in Computer Science   *Ghaziabad, UttarPradesh*
CGPA : 8.125

Professional Experience

Google Developer Student Clubs   **May 2022 – Present**
Web Coordinator   *Ghaziabad, UttarPradesh*

- Transformed club website with 2 key features: automated birthday emails and domain-specific event groups, elevating online presence and accessibility.
- Organized 3+ React.js and Node.js bootcamps, empowering peers with essential web development skills
- Coordinated and hosted 6+ skill development events focused on Python, React, and Cloud technologies, fostering student community knowledge sharing.

Freelance Web Developer   **Feb 2022 – Present**
Front End Developer   *Ghaziabad, UttarPradesh*

- Mastered Redux for efficient state management and executed numerous freelance projects, highlighting skills in React, MongoDB, Express, and Node.js. Delivered 3+ major and 4+ minor projects, emphasizing a dedication to high-quality solutions.
- Enhanced MERN stack projects by implementing 3 login features: JWT, Google Authentication, and Auth0, ensuring robust security and access control, while also optimizing scalability for efficient request handling.

Projects

MemoirMoments | React. js, Redux, Express,MongoDB, googleAuth, Git   **Source Code**

- Implemented engaging features for sharing personal memories and fostering active user interaction, including 'like' count and comment functionalities.
- Integrated CRUD (Create, Read, Update, Delete) operations for user-generated posts, giving users the ability to efficiently manage and curate their content.
- Enhanced platform security and user convenience by implementing Google Authentication, streamlining the user registration and login processes.

WriteWell | Node/Express, React , Redux, MongoDB , JWT   **Source Code**

- Enabled users to create and edit notes using a Markdown language editor.
- Developed functionality for users to manage their profiles, including options to edit passwords and personal details.
- Established an efficient Online Diary platform, empowering users to centrally store and organize their notes with a 100% reduction in scattered paper note usage.

Shopzilla | Reactjs, Redux, ContextApi , Auth0 , Git   **Source Code**

- Developed a robust shopping website with 1000+ products, featuring 4+ advanced filters for precise searches by price range, category, color, and company, along with a user-friendly search feature.
- Engineered an intuitive shopping cart system, empowering users to effortlessly perform 3 critical functions: adding, subtracting, and deleting products, all while ensuring real-time automatic subtotal updates.

Technical Skills

Languages: Java, JavaScript, C, C++, Html, Css, Ejs
Libraries / Frameworks: React Js, Redux, React Router, Express, Node Js, Tailwind, Bootstrap
Databases: MongoDB, SQL
Developer Tools: Git, GitHub, Vs Code, IntelliJ IDEA, Canva, Atom

Achievements

- Actively engaging in LeetCode, continuously enhancing problem-solving skills, and successfully solving over 150+ problems to date.

Leadership / Extracurricular

- Participated in 3+ Model United Nations (MUNs) and was acknowledged with distinction as a Special Mention Recipient at KIET MUN 2023. This recognition showcases my excellence in diplomacy and communication.
